

Ladies and Gentlemen at European Union, August 21, 2023

Brussels, Belgium and Strassburg, France

We, Ethiopians living and working in Europe are raising a cry of alarm to the European Parliament, the European Commission and to all representatives of western countries!

Since 2018, the year a new self acclaimed 7th king, named Abiy AHMED came to power in Ethiopia, who has been carrying out a planned and implemented genocidal policy towards other ethnic groups except his own (the Oromo) living in this country, more than one million people have already died, many of these crimes being committed in atrocious and barbaric ways. Millions more are forcibly displaced from their homes. Thousands more languishing in prisons with no basic human rights. Thousands more are forced into exile by impeneting Ethnic Federalism (Apartheid system) to divide and rule the people. A human tragedy is taking place with the total knowledge of Western countries and international bodies, not to mention sometimes with their support and complicity. As the genocide in Rwanda did not teach you any lessons, why you remain outrageously passive without moving a finger ?

This silence and carelessness all Western countries who claim to be defenders of the main charters of human rights seems incomprehensible to us is forcing us to question your sincerity.

In recent weeks, the bloodthirsty and genocidal government of Abiy Ahmed has been killing thousands of innocent people with drones and heavy weapons in the Amhara region (in northern Ethiopia) without the international authorities condemning its actions as a "crime against humanity".

"What is even worse of these attacks with planes, combat helicopters and drones are carried out against civilian populations under the order of the commander-in-chief of the army, General Yilma Merdasa, this same person has been recently appointed as chairman of Ethiopian Airlines. This proves the contempt for all rules and norms of international civil aviation. »

How can Abiy Ahmed, as the architect of such untold genocide still not being charged at ICC ? Ethiopia is now sinking into an unprecedented civil war and genocidal acts that the modern world has not known until now. To remain passive or inactive in the face of oppression makes you as guilty as the oppressor himself.

Therefore, we are requesting the European Union to investigate and communicate with our delegation so we can elaborate on this matter further. Our e-mail address is shown below.

Best Regards,

Association of Ethiopians in Europe.
